

# St Keyne & Trewidland Parish Council

## Sustainability/Climate Change/Green Issues Project

### 1 **Background**

Following the presentation to a Parish Council meeting in 2023 by a local resident, the Parish Council has resolved to promote and launch a potential Community Project Group focussed on Sustainability/Climate Change/Green Issues. The Parish Council has also resolved to promote this initiative with a full colour leaflet

### 2 **Project Summary and Benefit to Residents**

To launch the opportunity to local residents to take part in a group focussed on these issues. The purpose of the group would be to develop 'green' initiatives in the Parish which will have a demonstrable benefit to the community.

The launch will be promoted by a full colour leaflet, A4 folded. The leaflet will include an open invitation to a Launch Event at St Keyne Village Hall. Subsequent meetings of the Group will depend on the community response to the initiative.

### 3 **Cost**

Village Hall hire cost: To be confirmed at Parish Council meeting 10 April 24

Leaflet production cost: To be confirmed at Parish Council meeting 10 April 2024

### 4 **Timescales**

The leaflet would be distributed with the next edition of the Informer Magazine at the start of May. The launch meeting would take place in mid May at the earliest.

### 5 **Project monitoring and measurement of success**

The project could be led by one Councillor, with the support of a second Councillor, who will report to the Parish Council meeting after the Launch Meeting. The Parish Council will consider the success and future support for the project.

### 6 **Recommendation**

That the Parish Council approves the funding and timescales for the project and resolves which Councillors will lead the Project.
